

# PMI President's Malaria Initiative by the Numbers

## PMI CONTRIBUTIONS TO DATE

27 PMI programs in sub-Saharan Africa and the Greater Mekong Subregion have benefited from **\$5.4+ billion** in PMI funding to prevent, treat, and control malaria.

Procured life-saving commodities for PMI focus countries, including

 <b>268M+</b> insecticide-treated nets	 <b>350M+</b> rapid diagnostic tests	 <b>76M+</b> preventive treatments for pregnant women	 <b>479M+</b> antimalarial treatments	 <b>19M+</b> seasonal malaria chemoprevention treatments for children
--	---	--	--	--

Improved capacity in PMI focus countries to collect and use information by supporting

 <b>230</b> insecticide resistance monitoring sites	 <b>170+</b> site-specific therapeutic efficacy surveys	 <b>250</b> surveys to verify availability of malaria commodities at health facilities	 <b>80+</b> nationally representative household surveys to collect key malaria indicators
--	--	---	--

Partnered with

**200+**  
local and international non-profit organizations

Advanced the body of knowledge on malaria

**117**  
operational research studies

**200+**  
peer-reviewed publications

## In 2017, PMI

Procured **40M+** insecticide-treated nets, helping to protect all people at risk for malaria

Supported the spraying of **5M+** houses with insecticides, protecting **21M+** people

Procured **41M+** antimalarial treatments and **43M+** rapid diagnostic tests

Procured **10M+** preventive treatments for pregnant women

Procured **4M+** seasonal malaria chemoprevention treatments for children

Built capacity by supporting the training of

  
**27,266**  
IRS spray personnel

  
**9,361**  
health workers in seasonal malaria chemoprevention

  
**38,765**  
health workers in malaria diagnostic testing

  
**38,561**  
health workers in malaria case management

  
**36,399**  
health workers in intermittent preventive treatment for pregnant women

Read the report: [www.pmi.gov/report](http://www.pmi.gov/report)

RESULTS

PMI is contributing to global programs in malaria control:

7M

malaria deaths averted and 1 billion malaria cases prevented globally, primarily among children under five years of age in sub-Saharan Africa, between 2000 and 2015

54%

decline in malaria mortality

AND

30%

decline in malaria cases, in sub-Saharan Africa between 2006 and 2016

In PMI focus countries...

19

countries saw reductions in all-cause mortality rates of children under five years of age

2.2x

increase in the percentage of households owning at least one ITN: 33% to 71%

3x

increase in the percentage of individuals with access to an ITN within the household: 18% to 54%

2.6x

increase in the percentage of children sleeping under ITNs: 21% to 55%

2.3x

increase in the percentage of pregnant women sleeping under ITNs: 23% to 53%

2.1x

increase in the percentage of pregnant women receiving two or more doses of IPTp for the prevention of malaria: 22% to 46%

2.6x

increase in the percentage of pregnant women receiving three or more doses of IPTp for the prevention of malaria: 10% to 26%
